

(MW) as opposed to the authorized 5 Voith submersible turbine-generators with a total generating capacity of 2.64 MW. The proposed 6 units would have a total hydraulic capacity of approximately 2,636 cubic feet per second (cfs), as opposed to the total hydraulic capacity authorized for the 5 units of 2,295 cfs. The applicant states that this slight increase in the maximum hydraulic capacity should have no impact on fish entrainment since the inlet speed at the trashrack would still be well below the maximum inlet speed of 1.5 feet per second in the project license.

Coneross Power Corporation; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380, the Office of Energy Projects has reviewed the application for a subsequent license for the Coneross Hydroelectric Project No. 6731, located on Coneross Creek, in Oconee County, South Carolina, and has prepared an Environmental Assessment (EA) for the project. No federal land would be occupied by project works or located within the project boundary.

ACTION: Notice.

SUMMARY: The California Air Resources Board (CARB) has notified EPA that it has adopted amendments to its large spark-ignition engines fleets regulation (LSI amendments).
